

Corrigo Connector Overview

- Create Work Orders in Corrigo from the onPoint platform
- Add onPoint FDD Insights to Corrigo Work Orders
- Monitor Work Order progress with equipment performance data and Insights

Inform maintenance tasks with data-driven Insights

Better inform maintenance tasks and problem resolution by attaching advanced FDD Insights to Corrigo Work Orders. Streamline maintenance workflows with the ability to create Corrigo Work Orders straight from onPoint Work Requests.

Monitor Work Order status from onPoint

Ensure Work Orders have been completed effectively by monitoring and comparing Work Order statuses from Corrigo to actual equipment performance data in onPoint - all without having to leave the onPoint platform.

Shared Data

onPoint Data	Data Flow	Corrigo Data
Work Requests	↔	Work Orders

Corrigo Subscription

This connector requires a subscription to the Corrigo CMMS software. To learn more, visit <https://www.jllt.com/corrigo/>
